DETAILED ACTION

Response to Amendment

The preliminary amendment filed in Paper No. 6 on 7/25/2000 was received, entered and considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 9 are indefinite since it is not apparent how "treating" results in a "recovered solution" containing the polypeptide.

Claim 2 is indefinite in regard to incorrect recitation of "SEQ ID NO.:", which should be recited "SEQ ID NO:".

Claim 8 is indefinite since the components used in the process are polypeptides and polypeptides are recovered, not fibers and the claim does not indicate "fibers of polypeptides."

Claims 7, 8, 12, 13, 16, 17 and 18 are rejected as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the ones associated with "manipulating" the solution, necessary to produce the insoluble fibers and for not having a preamble.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United 13-9, 11-4, 15, 3

Claims 1, 3-9, 11-14 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Lombari et al.

The Lombardi et al. reference teaches a method of purifying and producing concentrated amounts of recombinant and non-recombinant spider silk proteins by solubilization, a host bacterial cell containing the polypeptide and use of organic acids hydrochloric and propionic acid for recovery of concentrated protein. (See Col. 2, line 10 - Col. 5, line 47).

Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia A. Robinson whose telephone number is 703-305-0096. The examiner can normally be reached on 8:00 - 4:30 Monday - Friday, off alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low can be reached on 703-308-2923. The fax phone
